

Lion Environmental's Statement of Qualification for Waste Management

Lion is a trusted partner for comprehensive waste management support, providing essential services to entities obligated to engage in waste management activities in compliance with current legislation in Poland.

As the responsibility for waste management falls on the waste producer, which includes activity-conducting entities and operating installations, we offer our expertise to streamline the waste management process and ensure compliance.

Our team at Lion excels in preparing documentation and overseeing the necessary steps to obtain the required waste decisions for your facility. We possess the knowledge and experience to properly identify and verify waste generating procedures, enabling us to provide tailored support in managing waste at your facility or operations.

One crucial aspect of waste management in Poland is registering and updating notification of data in the Polish online waste database known as BDO. Our experts will guide you through this process, ensuring accurate registration of your operations in the BDO database. Additionally, we can assist in identifying waste generating processes at your facility and exploring waste minimization options, allowing you to make informed decisions and comply with regulatory requirements.

When it comes to property transactions or assumptions, Lion can provide valuable insights by identifying waste materials, highlighting potential environmental liabilities, and estimating the costs associated with their removal, disposal, or management in accordance with national regulatory standards.

Furthermore, if your company deals with the production, import, or delivery of products such as electric equipment, batteries or accumulators, oils, tires, cars, packaging, or any other packaged products, we can guide you through the necessary processes for your company's national waste registration system entry, ensuring compliance with relevant regulations.

The comprehensive range of services we offer includes:

Registration, deregistration, and updating of data, as well as preparation of annual reports, in the Polish online waste database (BDO).

Obtaining an Integrated Pollution Prevention and Control (IPPC) permit for installations, particularly in the field of waste management.

Securing a waste generation permit. Acquiring a waste collection permit. Attaining a waste treatment permit. Preparation of fire protection plans required for permits related to waste collection, treatment, or generation, including its collection or treatment.

Development of requirements and estimation of costs for waste collection, removal, and disposal in accordance with Polish regulations.

Choose Lion as your trusted partner in waste management, and benefit from our expertise, meticulous attention to detail, and commitment to delivering solutions that align with regulatory standards. Our services will streamline your waste management processes, ensuring compliance and minimizing potential liabilities, while also supporting sustainable practices and waste minimization options.

World Class Environmental Social Governance Solutions

Lion Environmental is a leading ESG consultancy, offering comprehensive solutions to businesses seeking to enhance their environmental, social, and governance performance. With a strong emphasis on customer satisfaction, we have built a solid reputation as a trusted advisor in managing ESG risks and delivering successful projects across diverse industries.

At Lion Environmental, our team of seasoned professionals brings together a wealth of expertise from various natural sciences disciplines. Through our holistic approach, we provide expert guidance, pragmatic solutions, and measurable outcomes for our clients. We pride ourselves on our ability to view projects from multiple angles, ensuring comprehensive environmental assessments, auditing, sustainability, permitting, and outsourcing services.

Our commitment to excellence is reflected in our track record of on-time project delivery, coupled with transparent communication with all project stakeholders. We believe in fostering long-term relationships based on trust and satisfaction, as evidenced by our high rate of repeat clients who entrust us with their future endeavours.

With an extensive portfolio, we have been participating in the Polish energy transition, managing contaminated land, developing critical infrastructure, and assessing companies' ESG performance across all sectors of the industry. This diverse experience allows us to tailor our ESG consultancy services to meet the unique needs and regulatory requirements of each industry.

Partner with Lion Environmental to elevate your ESG performance and unlock sustainable growth. Our expertise, dedication to quality, and client-centric approach make us the ideal choice for businesses committed to environmental stewardship and responsible business practices.

Sebastian Stachowski

The past decade Sebastian, the founder and CEO of Lion Environmental, has skilfully guided the company through a period of inspiring growth and transformation, propelling it from a small EHS firm to a flourishing ESG consultancy and beyond. Alongside establishing Lion, he also founded REMEDy, a conference committed to addressing soil and groundwater contamination concerns.

With a unit of dedicated subject-matter experts, he leads the organization in participating in the Polish energy transition, managing contaminated land, developing critical infrastructure, and assessing companies' ESG performance. His experience working with leading EHS consultancies in the past has provided him with the necessary skills and expertise to provide top-shelf consulting services.

His commitment to excellence, expertise and dedication, has caused impressive growth and success for Lion. As a result of his leadership, Lion is now recognized as a leader in the industry, providing unparalleled consulting services to clients.

Monika Rzeźniczak

Is the Vice-President and Technical Director possesses over a decade of experience in the fields of environment and sustainability. With her extensive knowledge, she has become a trusted advisor to over 70 international and Polish clients on environmental engineering, sustainability, and ESG solutions.

Her diverse portfolio of managed projects spans several industries, including oil and gas, renewable energy, pharmaceuticals, waste management, and aerospace. Furthermore, Monika has participated in extensive environmental and water management studies, providing her with a wealth of knowledge in the field. Her experience in planning and agreeing offshore investments in Poland has positioned her as a respected leader in the industry. She is actively involved in driving ESG strategies for both Lion and her clients, showing great enthusiasm for sustainable technologies and investment development.

Her contributions to the field of sustainability have been recognized in the market, making her a highly sought-after professional. Her dedication, passion, and expertise continue to make a significant impact in the areas of environment and sustainability.
